COMPANY PROFILE

Indian Agricultural Commodities for Global Markets

ABOUT JQ EXPORTS

JQ EXPORTS is an India-based agricultural commodities export business offering sourcing and export coordination for international B2B buyers.

Our product portfolio covers spices, rice, pulses, grains, oil seeds, herbs and dehydrated agricultural products. We aim to align product specifications, packaging requirements, shipment planning and export documentation with each buyer's order requirements.

We focus our export-market development on the GCC, Africa and Southeast Asia, with product suitability, destination regulations and commercial terms reviewed for each proposed transaction.

Our approach is built around clear communication, specification-led sourcing, transparent quotations and coordinated export execution. Product availability, quality parameters, testing arrangements, certifications, packaging and delivery terms are confirmed for the specific order before commitment.

Our objective: To build dependable long-term business relationships by connecting international buyers with suitable Indian agricultural products and well-coordinated export solutions.

GLOBAL MARKETS

We focus on export-market development in key regions.

GCC

Middle East trading
and food markets

AFRICA

Growing food demand
across key markets

SOUTHEAST ASIA

Opportunities in food,
spice and commodity markets

JQ EXPORTS

Building Long-Term Partnerships
in Global Agricultural Trade

OUR VISION

To be a trusted partner for global buyers
in sourcing Indian agricultural commodities.

OUR MISSION

To deliver reliable, specification-led sourcing
and export solutions that create long-term
value for our buyers and suppliers.

OUR VALUES

Trust | Reliability | Integrity
Transparency | Long-Term Relationships

WHY CHOOSE JQ EXPORTS

Specification-led sourcing

Wide range of agricultural commodities

Flexible packaging options

Coordinated export documentation

Experienced export coordination

Focus on long-term business relationships

Turmeric Fingers

(Salem / Nizamabad)

Premium Quality Indian Turmeric for Global Markets

NATURAL
AROMA

HIGH
CURCUMIN

WIDELY
USED

01 TECHNICAL IDENTITY

Business Name : Turmeric Fingers (Salem / Nizamabad)
Scientific Name : *Curcuma longa*
Varieties : Salem, Nizamabad
HS Code : Provisional HS code — final classification subject to verification for exact product form and destination tariff.

03 FEATURES

- Natural yellow to deep golden colour
- Distinctive aroma and flavour
- Consistent size and clean appearance (as per grade)
- Suitable for polishing and powder processing
- Popular Indian varieties such as Salem and Nizamabad

05 QUALITY CERTIFICATION

Applicable certificates and documents such as phytosanitary certificate, fumigation certificate, COA and other regulatory documents can be arranged as per buyer requirements. The exact certification and documentation depend on the destination country and must be confirmed for each order.

07 PACKAGING PROCESS

- Cleaning and final inspection before packing
- Packing in suitable food-grade bags (e.g. PP, jute or multi-layer bags)
- Proper labelling as per buyer requirement
- Moisture protection and palletization (as applicable)
- Packaging specifications to be confirmed for each order

09 TESTING AND LABORATORY REQUIREMENTS

- Testing as per buyer and destination country requirements
- Common tests include moisture, foreign matter, curcumin content, microbiological parameters and pesticide residue (as applicable)
- To be conducted at an approved and accredited laboratory as per buyer instructions
- Test parameters and accepted limits to be confirmed for each order

11 COMPETITOR COUNTRIES

- Major competitor countries include Indonesia, China, Myanmar and other turmeric producing countries
- Market competitiveness depends on variety, quality, curcumin content, pricing and destination requirements
- To be reviewed based on current market conditions

13 SHIPMENT PROCESS

- Order confirmation and documentation
- Packing, labelling and container stuffing (as per plan)
- Export documentation (as per buyer and destination requirements)
- Shipment to the agreed port and sharing of shipping documents
- End-to-end coordination for smooth export execution

02 APPLICATIONS

- Food and spice processing industry
- Powder processing for retail and industrial use
- Food flavouring, seasoning and culinary use
- Traditional and herbal product formulations
- Extracts, oleoresins and nutraceutical applications

04 TARGET MARKETS

- GCC countries
- Africa
- Southeast Asia
- Other potential markets subject to destination regulations and buyer requirements

06 PROCESSING PROCESS

- Sourcing from verified suppliers (variety and grade as per requirement)
- Cleaning, de-stoning and sorting
- Boiling (as applicable), drying and polishing
- Grading, quality inspection and preparation for packing
- Exact processing methods may vary by supplier and must be confirmed for the specific order.

08 CONTAINER TYPE AND LOADING

- 20 ft or 40 ft container (standard or high cube)
- Loading quantity to be calculated based on product density, packaging type and legal payload limits
- Exact container capacity will depend on packaging size, loading method and destination port requirements

10 INDIA AVAILABILITY AND SUPPLIER LOCATION

- Widely available in major turmeric growing regions in India
- Key growing states include Tamil Nadu (Salem), Telangana (Nizamabad) and other turmeric producing regions
- Supplier locations and specific availability to be confirmed for each order based on required variety, grade and quantity

12 RATE STRUCTURE

- Prices are quotation-based and depend on variety, grade, product form, quantity, packaging, testing requirements, destination and incoterms.
- Please share your specific requirements to receive a detailed and competitive quotation.

14 WHY CHOOSE JQ EXPORTS

- Specification-led sourcing aligned with buyer requirements
- Access to reliable suppliers and consistent quality
- Transparent communication and professional coordination
- Support with documentation, packaging and shipment planning
- Focus on long-term and mutually beneficial business relationships

BLACK PEPPER (MG1 / FAQ)

Bold Flavour. Global Preference.

Indian black pepper is known for its strong aroma, pungent flavour and high oleoresin content. Available in MG1 (Malabar Garbled 1) and FAQ (Fair Average Quality) grades, it is widely used in culinary preparations, food processing and industrial applications across global markets.

PRODUCT GRADES | Available as per buyer requirements

MG1 (MALABAR GARBLED 1)

- Larger and uniform size
- Dense, heavy and well-formed berries
- Dark colour with strong aroma
- Preferred for premium markets
- Suitable for culinary and industrial use

FAQ (FAIR AVERAGE QUALITY)

- Good quality with natural appearance
- Wide range of size and bold berries
- Characteristic pungent taste
- Suitable for food processing, blends and general use
- Cost-effective option for global markets

KEY FEATURES

- ✓ Strong, pungent and characteristic aroma
- ✓ High piperine and oleoresin content
- ✓ Cleaned, sorted and graded
- ✓ Available in MG1 and FAQ grades
- ✓ Suitable for culinary, food processing and industrial applications
- ✓ Custom specifications as per buyer requirements

APPLICATIONS

Culinary preparations and spice blends
Sauces, marinades and seasoning mixes
Processed foods and ready-to-eat meals
Meat, poultry and seafood products
Food service, hotels and restaurants
Oleoresin and essential oil extraction
Pharmaceutical and nutraceutical use

QUALITY PARAMETERS (As per buyer requirements)

Appearance	Dark brown to black, wrinkled berries
Piperine content	As per specification
Moisture	As per requirement
Foreign matter	Minimal (as per grade)
Volatile oil content	As per specification
Berry size	Uniform (as per grade)
Density	High and heavy berries
Colour	Dark brown to black
Other parameters	As per agreed specification

TESTING (AS REQUIRED)

- ✓ Quality parameters as per buyer requirements
- ✓ Testing can be arranged through reputed laboratories

GREEN CARDAMOM (ELAICHI)

Premium Aroma. Natural Goodness. Global Demand.

Indian green cardamom (elaichi) is valued for its intense aroma, sweet and refreshing flavour and wide range of culinary, beverage and industrial applications. Carefully selected and cleaned pods are packed to preserve natural colour, aroma and quality, meeting international market requirements.

PRODUCT GRADES

Available as per buyer requirements

8 MM GRADE

- Large pods, bold size
- Strong aroma and flavour
- Preferred for premium markets
- Suitable for culinary and premium applications

7 MM GRADE

- Medium size pods
- Good aroma and uniformity
- Widely used in food and beverage industry
- Suitable for retail and industrial use

6 MM GRADE

- Smaller pods
- Consistent quality
- Suitable for food processing, blends and industrial use
- Popular in bulk supply

KEY FEATURES

- ✓ Intense, sweet and refreshing aroma
- ✓ Natural green colour
- ✓ Cleaned, sorted and graded
- ✓ Available in multiple pod sizes
- ✓ Suitable for culinary, beverage and confectionery applications
- ✓ Careful handling and packaging to preserve quality
- ✓ Custom specifications as per buyer requirements

APPLICATIONS

- Culinary preparations and spice blends
- Tea, coffee and beverage industry
- Confectionery and bakery products
- Flavouring and essence extraction
- Food service, hotels and restaurants
- Ayurvedic and traditional products
- Other industrial applications

QUALITY PARAMETERS (As per buyer requirements)

Appearance	Green pods, well-formed
Aroma	Strong and characteristic
Pod size	6 mm / 7 mm / 8 mm (as per grade)
Moisture	As per specification
Foreign matter	Minimal (as per grade)
Immature / split pods	As per buyer requirements
Volatile oil content	As per specification
Colour	Natural green
Other parameters	As per agreed specification

TESTING (AS REQUIRED)

- ✓ Quality parameters as per buyer requirements
- ✓ Testing can be arranged through reputed laboratories
- ✓ Parameters may include moisture, volatile oil content, foreign matter, aflatoxin (as applicable) and other tests
- ✓ Test reports are shared with buyers as per agreed terms

PACKAGING OPTIONS

SHELF LIFE & STORAGE

- Store in a cool, dry and well-ventilated place
- Protect from direct sunlight
- Keep away from moisture and strong odours
- Maintain proper storage conditions to preserve aroma and quality
- Use food-grade packaging for best results

NON-BASMATI RICE (IR64 / SWARNA)

Reliable Quality. Wide Applications. Global Demand.

Indian non-basmati rice varieties such as IR64 and Swarna are valued for their consistent quality, good milling recovery and wide range of culinary and industrial applications. They are widely used for daily consumption, food processing and institutional supply across global markets.

PRODUCT VARIETIES | Available as per buyer requirements

IR64 RICE

- Medium to long grain
- Good cooking quality
- High milling recovery
- Widely used in daily consumption and food processing
- Popular in international markets

SWARNA RICE

- Medium grain
- Soft texture after cooking
- Good milling quality
- Widely used for domestic and global markets
- Suitable for institutional and bulk supply

APPLICATIONS

- Daily consumption (cooked rice)
- Food processing industry
- Ready-to-eat and convenience foods
- Institutional supply (hotels, restaurants, caterers)
- Rice flour and value-added products
- Animal feed (by-products)
- Other industrial applications

QUALITY PARAMETERS

(As per buyer requirements)

Grain type	Medium to long (IR64) / Medium (Swarna)
Appearance	Natural white, clean and glossy
Grain length	As per variety and specification
Moisture	As per buyer requirements
Broken rice	As per buyer requirements
Foreign matter	Minimal (as per grade)
Milling recovery	As per variety and processing
Purity	As per buyer requirements
Chalkiness	As per specification
Other parameters	As per agreed specification

KEY FEATURES

- ✓ Consistent quality and milling recovery
- ✓ Cleaned, sorted and graded
- ✓ Available in IR64 and Swarna varieties
- ✓ Suitable for daily consumption and food processing
- ✓ Uniform grain size with minimal foreign matter
- ✓ Custom specifications as per buyer requirements

TESTING (AS REQUIRED)

- ✓ Quality parameters as per buyer requirements
- ✓ Testing can be arranged through reputed laboratories
- ✓ Parameters may include moisture, broken percentage, foreign matter, chalking and other applicable tests
- ✓ Test reports are shared with buyers as per agreed terms

PACKAGING OPTIONS

SHELF LIFE & STORAGE

- Store in a cool, dry and well-ventilated place
- Protect from direct sunlight
- Keep away from moisture and strong odours
- Maintain proper storage conditions to preserve quality and shelf life
- Use food-grade packaging for best results

CHICKPEAS (DESI & KABULI)

Nutritious. Versatile. Global Demand.

Indian chickpeas are valued for their high nutritional content, excellent taste and wide range of applications. Available in Desi (small, dark) and Kabuli (large, light) varieties, they are widely used in culinary preparations, food processing and industrial applications across global markets.

PRODUCT VARIETIES | Available as per buyer requirements

DESI CHICKPEAS

- Smaller size, darker colour
- Strong flavour and firm texture
- Widely used in traditional dishes, flour and ready-to-eat products
- Popular in domestic and international markets

KABULI CHICKPEAS

- Larger size, light cream colour
- Mild taste and smooth texture
- Preferred for culinary and processed food applications
- High demand in global markets

KEY FEATURES

- ✓ Rich in protein, fibre and essential nutrients
- ✓ Good taste and consistent quality
- ✓ Cleaned, sorted and graded
- ✓ Available in Desi and Kabuli varieties
- ✓ Suitable for human consumption, food processing and industrial applications
- ✓ Custom specifications as per buyer requirements

APPLICATIONS

- Direct consumption (boiled, cooked)
- Flour (besan/chickpea flour)
- Snacks and namkeen
- Canned and processed foods
- Food service, hotels and restaurants
- Animal feed (by-products)
- Other industrial applications

QUALITY PARAMETERS

(As per buyer requirements)

SOYBEAN MEAL (FEED GRADE)

**High Protein Nutrition.
Reliable Supply. Global Demand.**

Soybean meal is a protein-rich animal feed ingredient obtained after extraction of soybean oil. It is widely used in poultry, cattle, aquaculture and other livestock feeds due to its excellent amino acid profile, high nutritional value and consistent quality.

PRODUCT FORM

Soybean meal (flakes)
(typical form)

Soybean meal (ground)
(as per buyer requirement)

APPLICATIONS

- Poultry feed (broilers, layers)
- Cattle and dairy feed
- Aquaculture and fish feed
- Swine feed
- Pet food (as per formulation)
- Compound feed manufacturing
- Other animal nutrition applications

QUALITY PARAMETERS (As per buyer requirements)

Parameter	Typical Specification (Feed Grade, Indicative)
Protein (on dry basis)	44 – 48 %
Moisture	≤ 12 %
Oil content (residual)	1 – 3 %
Crude fibre	≤ 7 %
Crude ash	≤ 7 %
Sand & silica	≤ 2 %
Urease activity	Low (as per standard)
Particle size	As per buyer specification
Colour	Light yellow to light brown
Odour	Characteristic, non-rancid

Specifications can be customised as per buyer requirements.

KEY FEATURES

- ✓ High protein content
- ✓ Good amino acid profile
- ✓ Suitable for poultry, cattle, aquaculture and other livestock feeds
- ✓ Consistent quality and uniform particle size
- ✓ Processed and packed under hygienic conditions
- ✓ Available in different grades as per buyer requirements
- ✓ Reliable supply for international markets

TESTING (AS REQUIRED)

- ✓ Quality parameters as per buyer requirements
- ✓ Moisture, protein, fibre, ash and oil content
- ✓ Urease activity (as applicable)
- ✓ Microbiological testing (TPC, yeast & mould, pathogens)
- ✓ Pesticide residue testing (as applicable)
- ✓ Aflatoxin testing (as applicable)
- ✓ Testing can be arranged through reputed laboratories
- ✓ Test reports are shared with buyers as per agreed terms

PACKAGING OPTIONS (BULK PACKS)

SHELF LIFE & STORAGE

- Store in a cool, dry and well-ventilated place
- Protect from moisture and direct sunlight
- Keep away from strong odours
- Maintain proper storage conditions to prevent lumping and quality deterioration
- Use suitable, food-grade packaging for best results

HS CODE (PROVISIONAL)

2304.00

(Soybean meal, whether or not ground)

HS code is provided for general reference only. The applicable HS code may vary based on product form, processing and destination country regulations.

MARKET INFORMATION

- **Major Markets:** Asia, Middle East, Africa, Europe and other international markets
- **Demand:** Widely used in animal feed industry
- **Supply:** As per seasonal availability and confirmed orders
- **Specifications, packing and documentation** can be tailored as per buyer requirements.

CUSTOMISATION

- Different grades (protein, particle size, etc.) as per buyer requirements
- Customised bulk pack sizes (2.5, 10, 15, 20 or 25 kg)
- Product specifications as per market needs
- Branding and private label options (as per agreement)

PEARL MILLET (BAJRA)

**Nutritious Grain. Natural Goodness.
Global Demand.**

Pearl millet (bajra) is a highly nutritious cereal grain known for its rich dietary fibre, essential minerals and natural energy. It is widely consumed for human food and also used in animal feed and various food processing applications.

PRODUCT VIEW

Whole Pearl Millet
(Bajra Grain)

Cleaned and Sorted
(typical view)

APPLICATIONS

Human consumption
(flour, porridge, traditional foods)

Breakfast cereals and ready-to-eat foods

Food processing and baking products

Animal feed (poultry, cattle, livestock)

Malt and health foods

Other industrial applications

QUALITY PARAMETERS

(As per buyer requirements)

Parameter	Typical Specification (Indicative)
Appearance	Clean, natural grain
Colour	Grey to light brown
Grain size	Uniform, as per grade
Moisture	≤ 12 %
Foreign matter	≤ 2 %
Broken grains	≤ 3 %
Damaged/discoloured	≤ 1 %
Purity	≥ 98 %
Other parameters	As per buyer specification

KEY FEATURES

- ✓ Natural and wholesome grain
- ✓ Rich in dietary fibre and essential minerals
- ✓ Good source of natural energy
- ✓ Cleaned, sorted and graded
- ✓ Suitable for human consumption, animal feed and food processing
- ✓ Available in different grades as per buyer requirements
- ✓ Consistent quality and reliable supply

TESTING (AS REQUIRED)

- ✓ Quality parameters as per buyer requirements
- ✓ Moisture, foreign matter and broken grains
- ✓ Microbiological testing (TPC, yeast & mould, pathogens)
- ✓ Pesticide residue testing (as applicable)
- ✓ Aflatoxin testing (as applicable)
- ✓ Testing can be arranged through reputed laboratories
- ✓ Test reports are shared with buyers as per agreed terms

PACKAGING OPTIONS (BULK PACKS)

SHELF LIFE & STORAGE

- Store in a cool, dry and well-ventilated place
- Protect from direct sunlight
- Keep away from moisture and strong odours
- Maintain proper storage conditions to preserve grain quality
- Use suitable, food-grade packaging for best results

HS CODE (PROVISIONAL)

1008.29

(Pearl millet, other)

HS code is provided for general reference only. The applicable HS code may vary based on product form, processing and destination country regulations.

MARKET INFORMATION

- **Major Markets:** Asia, Middle East, Africa, Europe and other international markets
- **Demand:** Widely used for human food, animal feed and food processing
- **Supply:** As per seasonal availability and confirmed orders
- **Specifications, packing and documentation** can be tailored as per buyer requirements.

CUSTOMISATION

- Different grades and cleaning levels as per buyer requirements
- Customised bulk pack sizes (2, 5, 10, 15, 20 or 25 kg)
- Product specifications as per market needs
- Branding and private label options (as per agreement)

Buyer Enquiry & Commercial Review

Complete these details so product suitability and terms can be reviewed.

PRODUCT & ORDER

- Product and form (whole, powder, split, flakes, feed grade)
- Variety / grade and required technical specification
- Quantity, shipment frequency and preferred pack size
- Destination country, port and delivery point
- Preferred Incoterm and target shipment window
- Buyer company, contact name, email and telephone

QUALITY & DOCUMENTS

- Required tests, limits and sampling protocol
- Certificates / export documents required by destination
- Label language, traceability and storage requirements
- Private-label artwork or buyer-brand packaging brief
- Container preference and loading constraints, if known

COMMERCIAL & VERIFICATION NOTES

- HS codes are provisional; verify exact product form and destination tariff.
- Specifications, grades and availability are order- and supplier-specific.
- Testing and certificates must be verified for the actual transaction.
- Packaging mockups are concepts; confirm material, food-contact suitability and sizes.
- Prices, MOQ, freight, loading quantity and lead time are quotation-based.
- Images are illustrative unless explicitly identified as a verified stock lot.
